COMP30860 Web Development

Project Wireframe

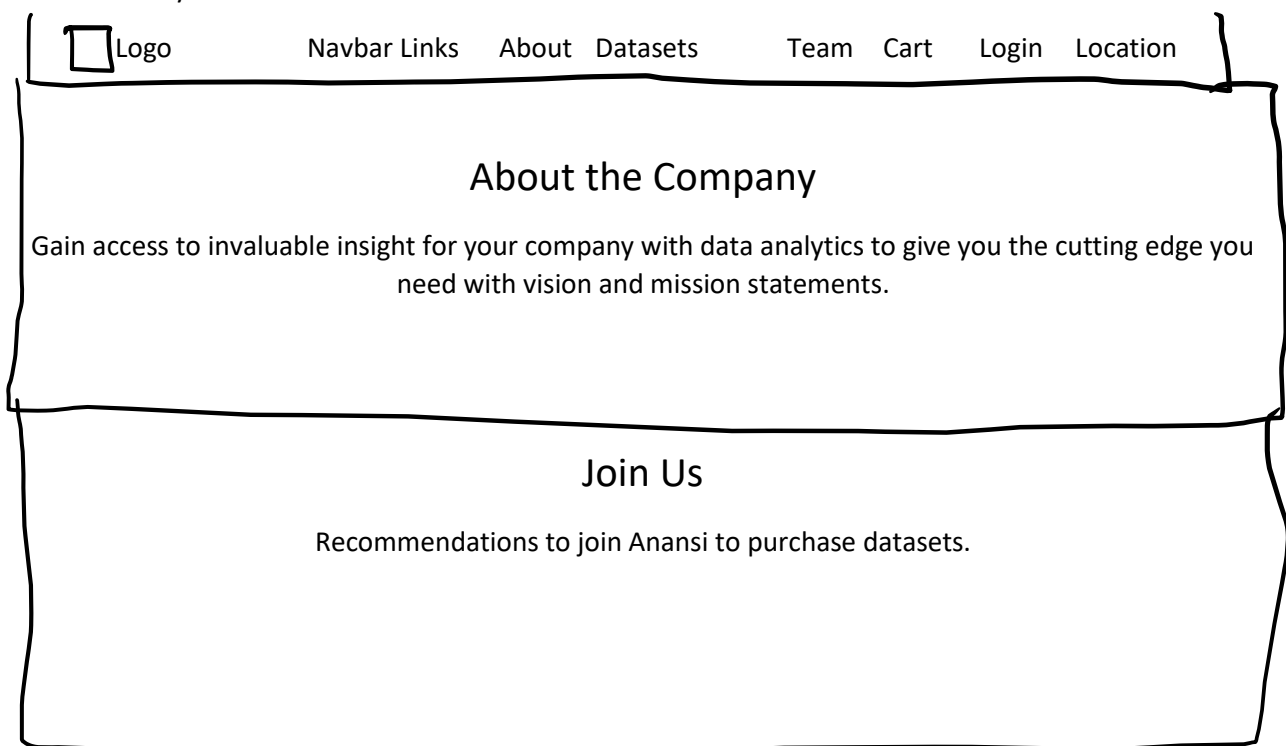

User Pages:

- index – homepage with a floating navbar. Display information about the company, the team, featured products and company location
- all datasets – a user view into all active datasets with a floating navbar and filters to change the view. Each dataset has links to view the details.
- individual asset view – a user view of individual asset details with the ability to add the asset to the shopping cart.
- shopping cart – a user view of datasets which have been added to the cart with options to modify the quantity of each dataset in the cart, delete from the cart, and pay for items.
- Order history – a user view to see past orders
- user account – a user view to show the details of user's account and view past orders.
- login/sign up – a user view to allow users to sign up and/or login to their account.

Admin Pages:

- admin login – a user view to login with admin credentials which will redirect to an admin portal. The admin login page will be accessible through the standard user login page.
- Datasets all – an admin view into the database of assets and tools to modify the database.
- View dataset – an admin view to update the dataset, including the ability to deactivate assets.
- New user – an admin view to manually add users, admin or customer
- View all orders – an admin view to see all orders
- View order – an admin view to individual orders

Featured Assets

A listing of featured assets with brief descriptions.

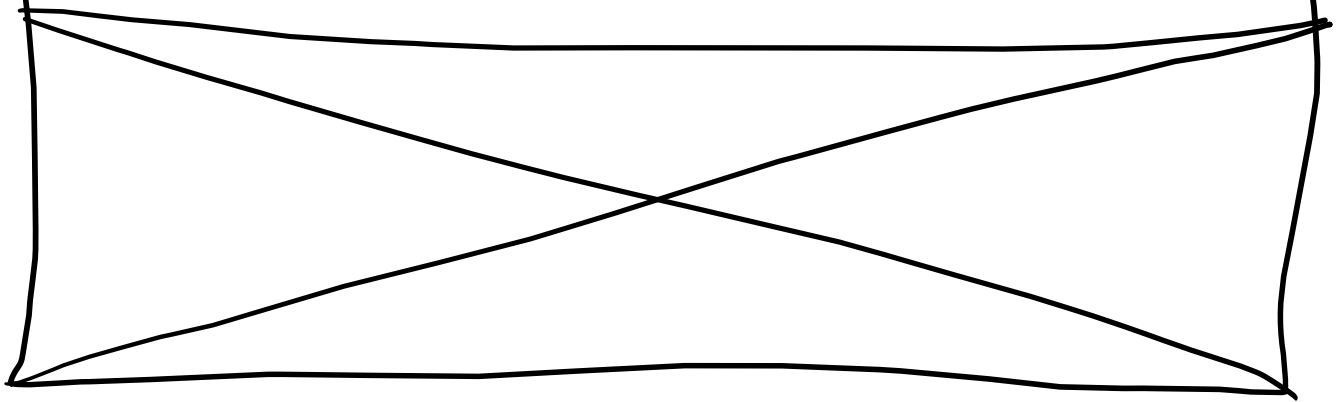

Our Team

A list of the team members with their jobs

Location

A zoom-able map with the company address location

shoppingcart.html

Same Navbar from index.html

SHOPPING CART

| Product Details | Price | Quantity | Delete |
|----------------------|----------------------|--|--|
| <input type="text"/> | <input type="text"/> | <input type="text" value="-"/> <input type="text" value="#"/> <input type="text" value="+"/> |  |

PAYMENT

Payment Box

login.html and adminlogin.html

Same Navbar from index.html

login.html will have a flip/flop for login/signup. adminlogin.html will only have Login option.

The image shows two hand-drawn wireframes side-by-side. The left wireframe is titled 'Login' and contains three horizontal input fields stacked vertically, followed by a single rectangular button at the bottom. The right wireframe is titled 'Sign Up' and contains four horizontal input fields stacked vertically, followed by a single rectangular button at the bottom.

alldatasets.html and adminportal.html

Same Navbar from index.html

Filters by dataset type

A vertical list of four checkboxes. The first three are checked (marked with a checkmark), and the fourth is unchecked. Each checkbox is followed by a wavy line representing a label.

List of datasets (admin portal will also have and de-activate box)

A hand-drawn table with two columns. The first column contains two large rectangular boxes representing dataset names. The second column contains two small square checkboxes. Below the table, there are three small circles arranged vertically, indicating that the list continues.

Add New Dataset

(only on admin portal)

A hand-drawn form with a rounded rectangle border. Inside, there are four horizontal bars of varying lengths, stacked vertically. Below these bars is a single, smaller horizontal bar.

View Orders Link

A simple hand-drawn rectangular button with a thin border.

viewdata.html

Same Navbar from index.html

Dataset Details

A hand-drawn form with a rounded rectangle border. Inside, there is a large horizontal bar at the top, followed by three smaller horizontal bars stacked vertically.

Add to Shopping Cart

A hand-drawn form with a rounded rectangle border. Inside, there is a horizontal bar containing three small square buttons with minus, equals, and plus signs respectively.

A simple hand-drawn rectangular button with a thin border.
